

We solved task automation

Why is our free time still a mess?

What happens to the time we save?

Smart Calendars

Distraction Blockers

AI chats

AI Agents

Learning platforms

Cloud Services

Automated Systems

Finance Managing AI

Flow

- Intentional Tracking
- Unbreakable Focus
- Autonomous agents

1. You set a goal/task
2. Flow blocks distractions smartly
3. Before you mark it done, it asks questions for validation

No more just mark as done, Flow always validates

And this leads you to grow as a professional

Why now?

LLMs + API Access = Autonomous Enforcement

Use Case

Who Bleeds Most?

Builders & Founders

Turning weekend hours into shipped products.

Remote Workers

High autonomy. High distraction.

System-Seekers

Relying on architecture, not raw willpower.

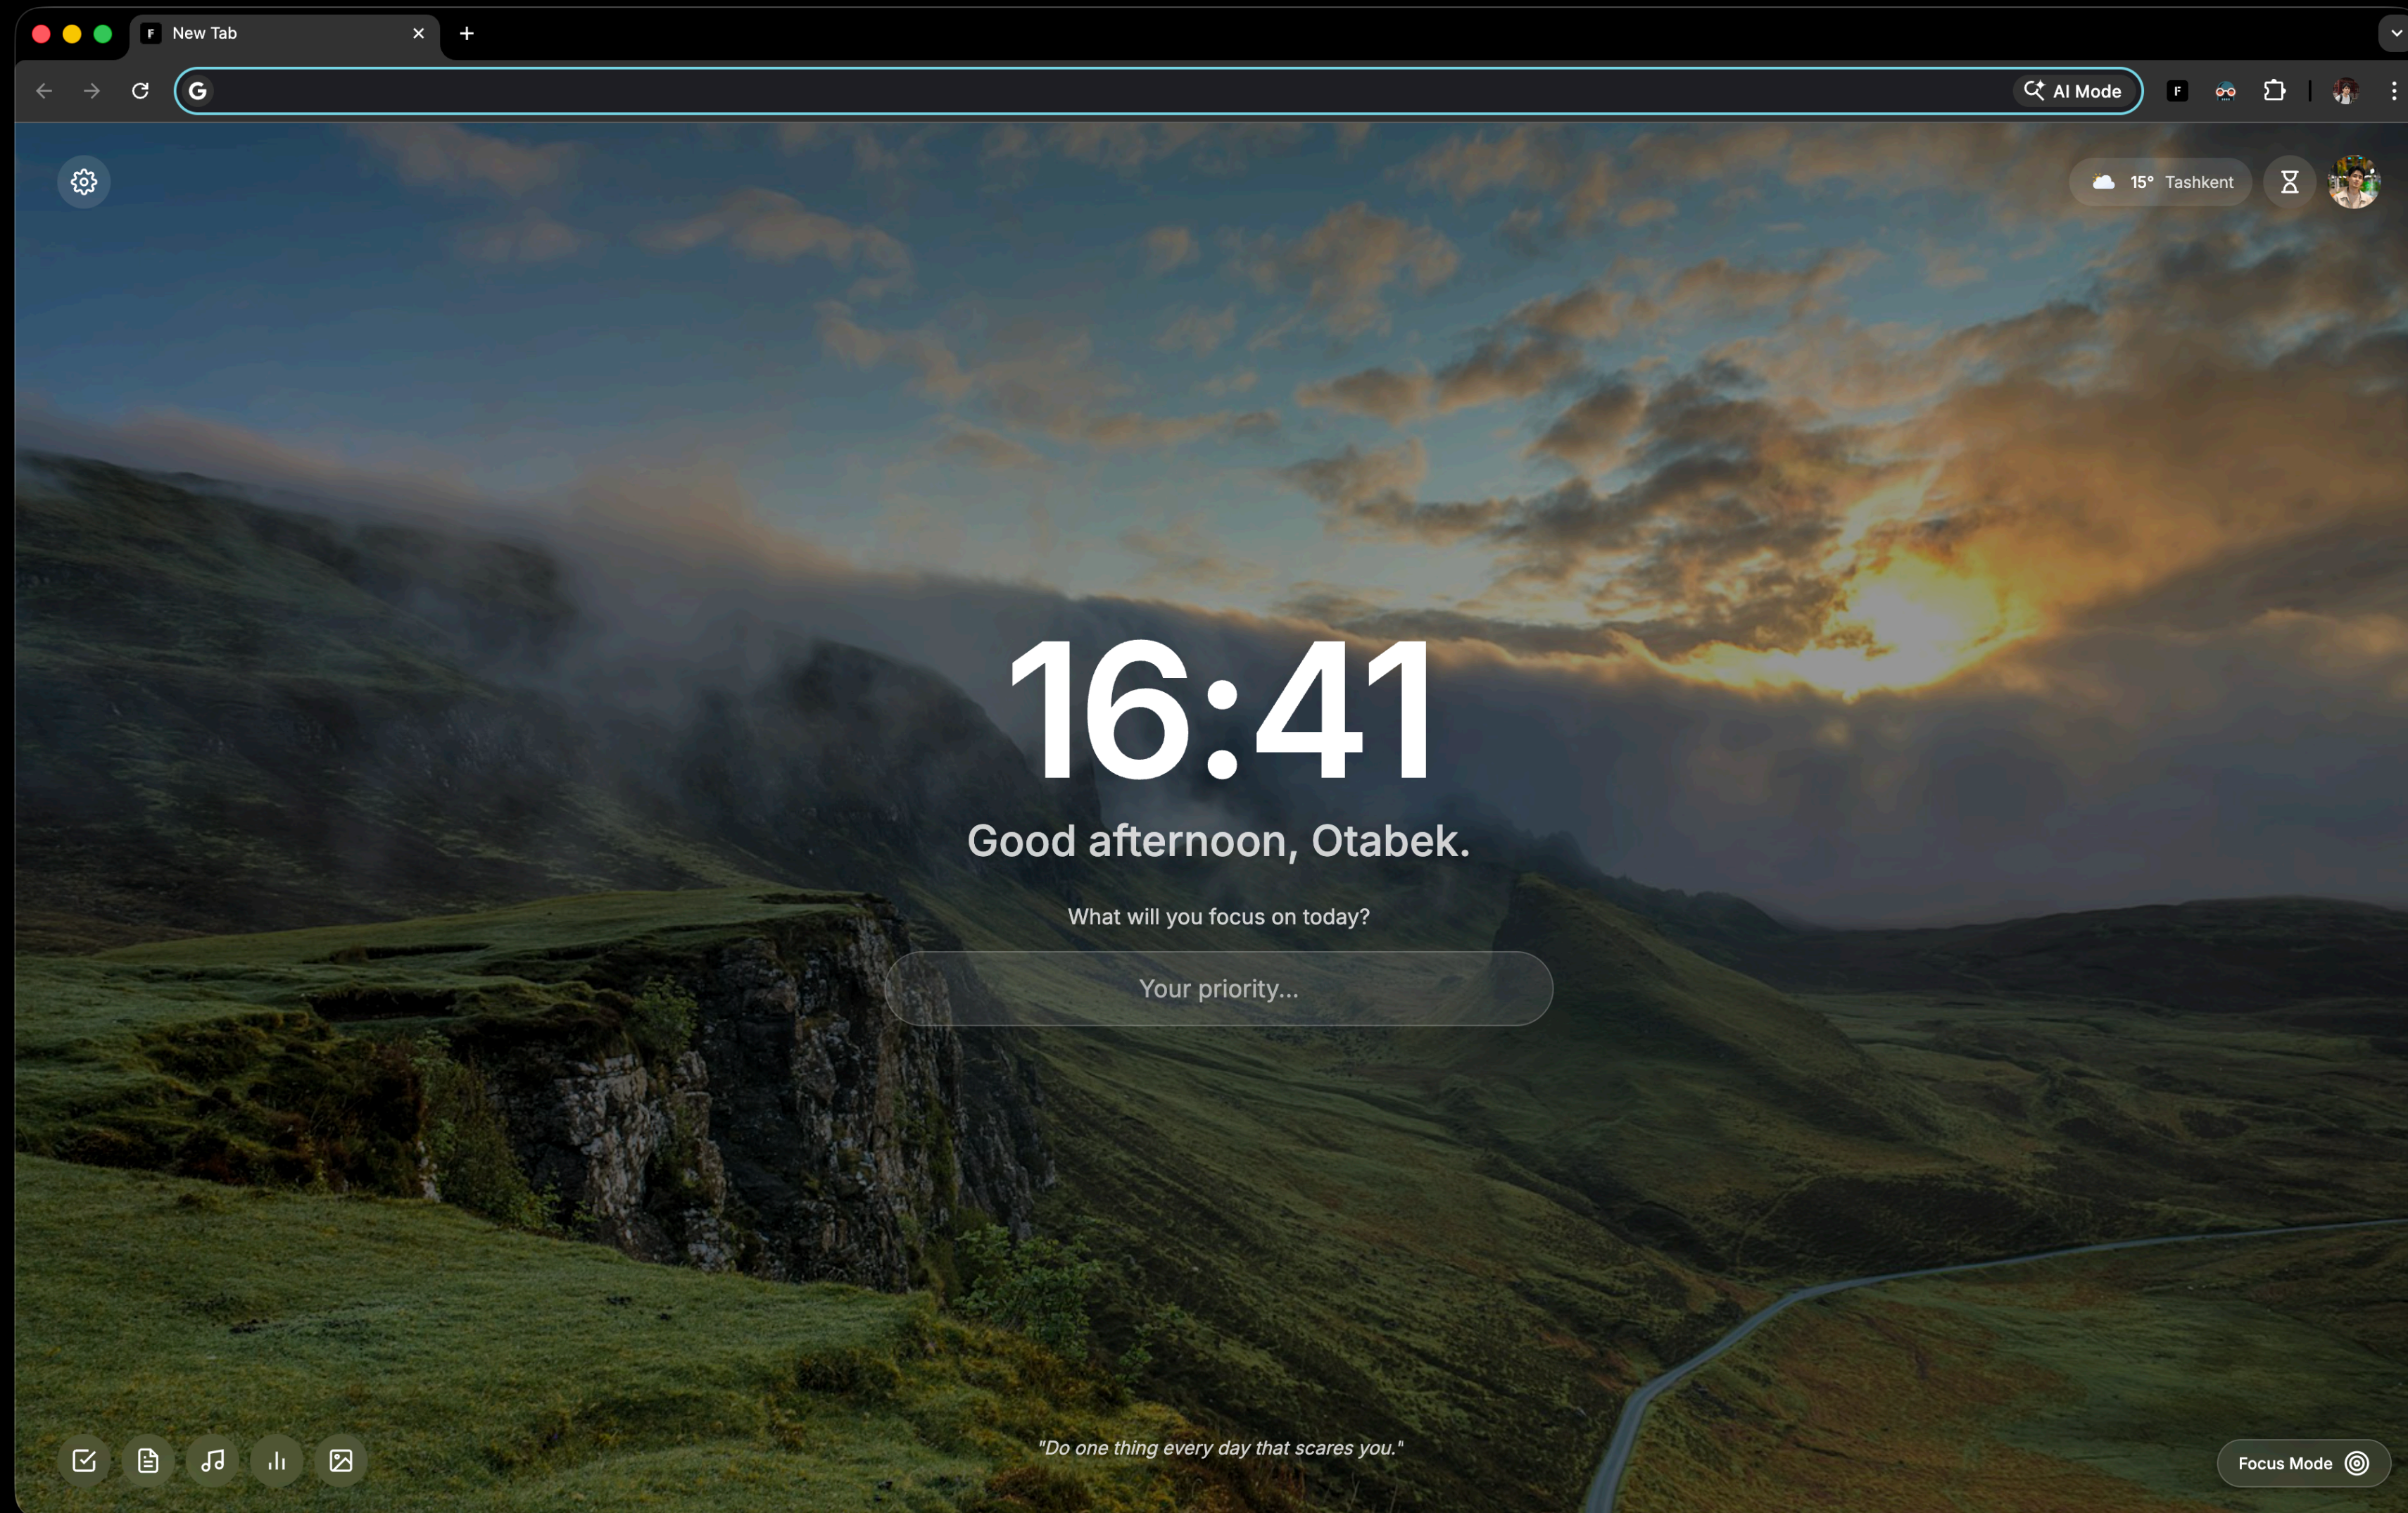

TAM — \$115 billion

SAM — \$5 billion

SOM — \$2 million ARR

Freemium —> Premium ^{\$10/month}

We started from Chrome Extension

next for Mobile

We gained > 2k users with \$0 marketing cost

12 – 14 months

Asking \$120K for 8%

Otabek Nurmuhammad
