

GENIX

Revolutionizing Enterprise Resource Planning
with Generative AI

10x

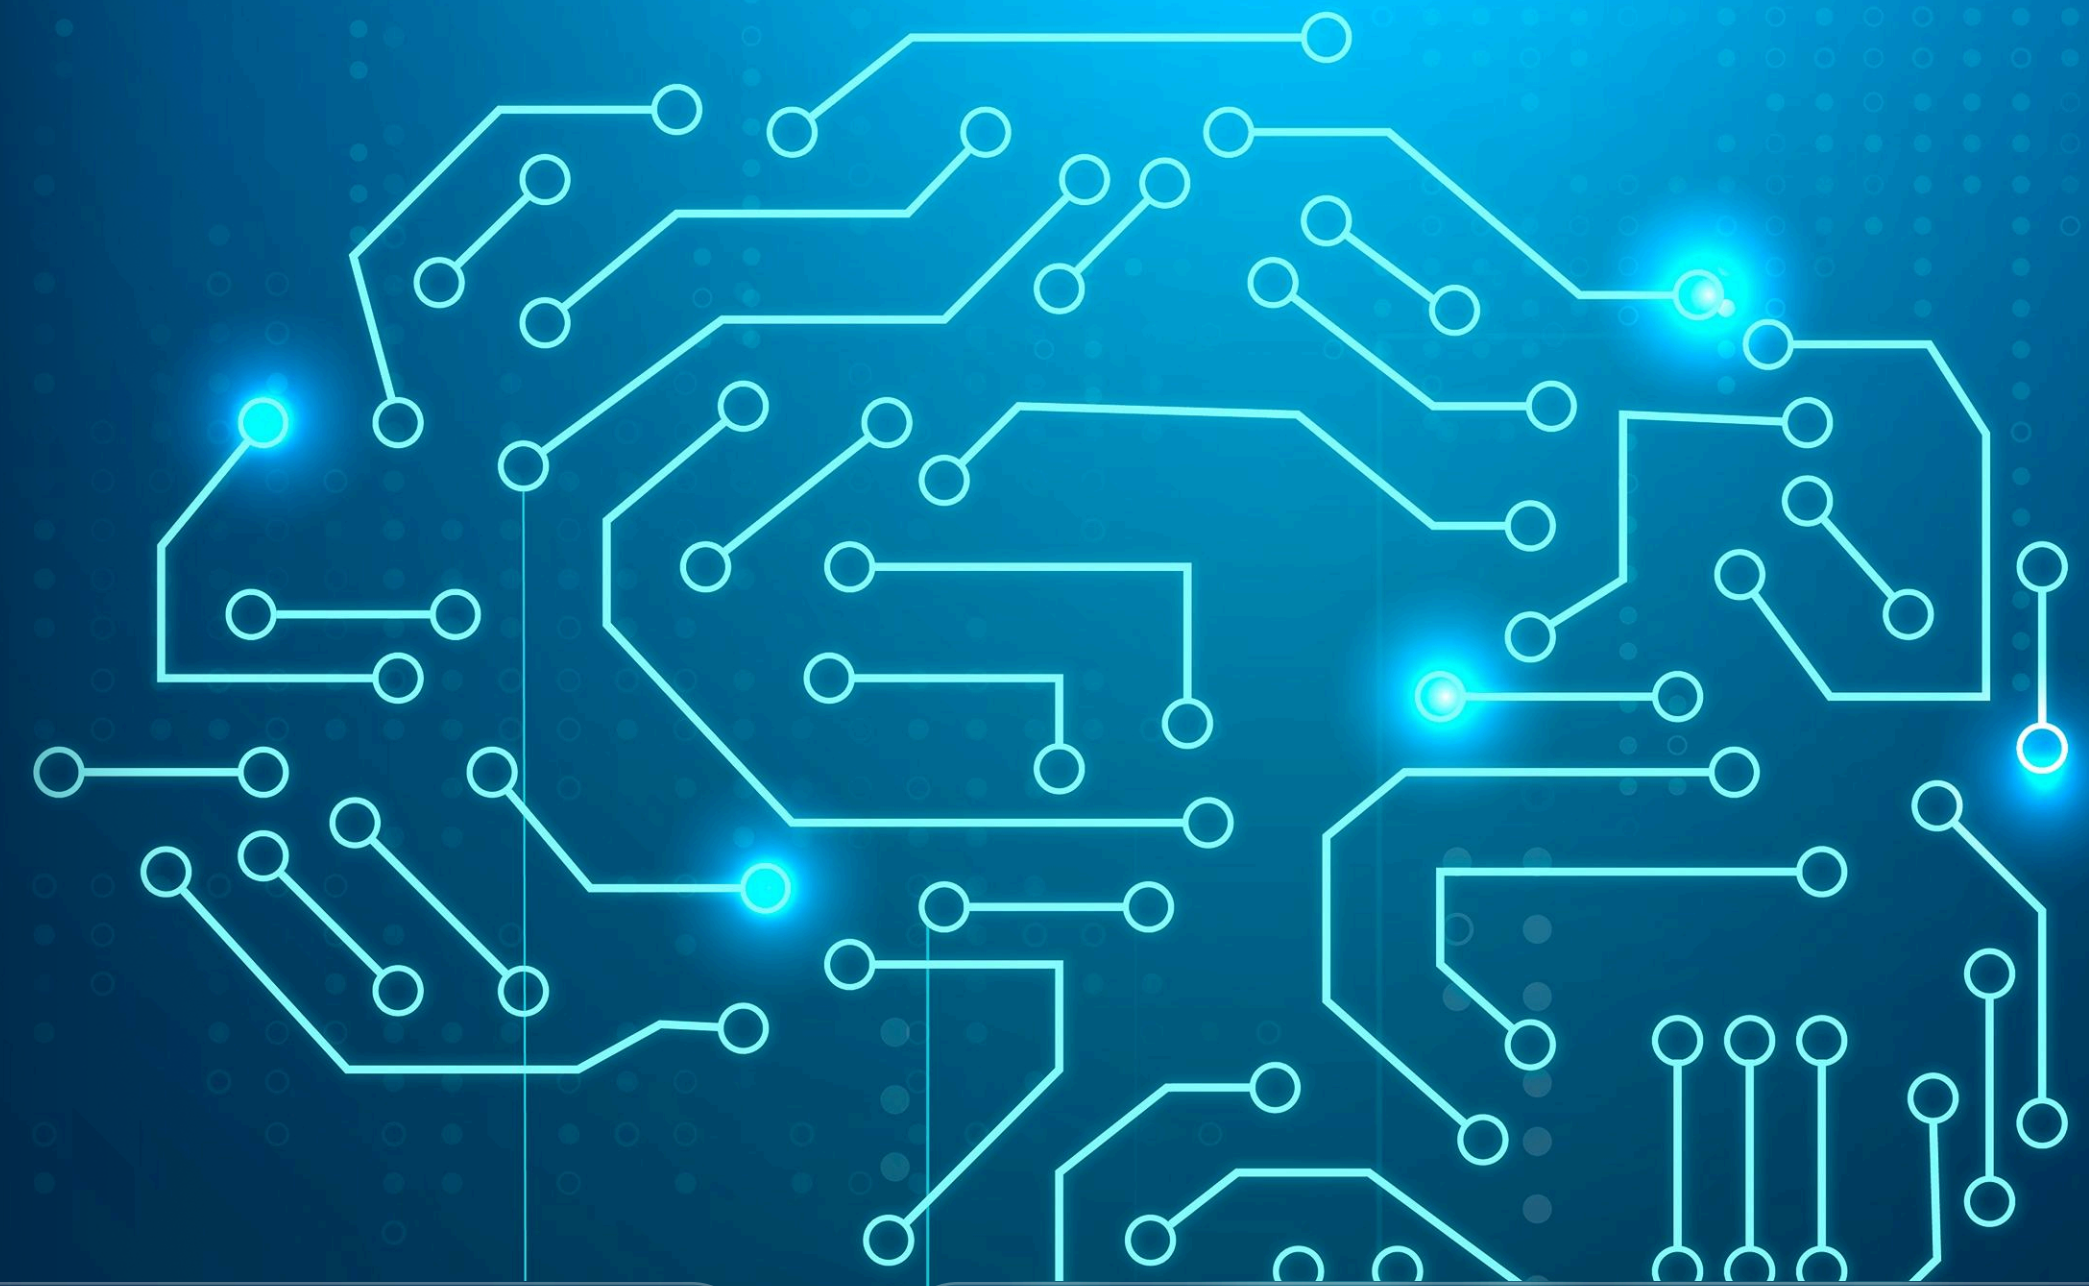

Faster Implementation

75%

Productivity Increase

80%

Process Automation

Problem

Traditional ERPs are failing to meet the needs of modern businesses

Implementation Hell

Average ERP implementation takes 18-24 months with 60% failure rate

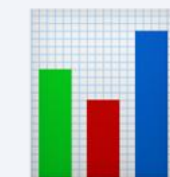

Rigid Systems

Legacy ERPs can't adapt to rapid business changes and modern workflows

Poor Adoption

Complex interfaces lead to 45% user adoption rates and productivity loss

Limited Intelligence

No predictive capabilities or intelligent automation

Introducing Genix

Generative AI-native ERP platform

AI-First Architecture

Built from ground up with Gen AI at its core, not bolted on as an afterthought

Natural Language Everything

Configure, query, and operate your entire ERP through conversation

Self-Implementing System

AI automatically configures workflows based on your business description

Predictive Operations

Anticipate issues, optimize resources, and automate decisions in real-time

Autonomous Agents

AI agents handle routine tasks, freeing teams for strategic work

Continuous Learning

System evolves with your business, getting smarter every day

Traction
